SKU: MGTP0615-01

TWIN PEDESTAL GREASE REEL - 9MM X 15M

Grease reel - spring-rewind, heavy-duty reel ideal in truck mount & mine applications.

[Read More](#)

SKU: MGTP0915-01

SINGLE PEDESTAL OIL REEL - 12MM X 20M

Oil reel - spring-rewind, suits longer hose demands in medium/large workshops.

[Read More](#)

SKU: MOS1220-01

BARE SINGLE PEDESTAL REEL (SUITS 1/2" X 20M)

Universal reel - bare (without hose) - spring-rewind. Suits longer hose demands in medium/large workshops where either existing or specialty type hoses are used.

[Read More](#)

SKU: MRS1320N-01

BARE TWIN PEDESTAL REEL (SUITS 1/2" X 20M)

Universal reel - bare (without hose) - spring-rewind. Heavy-duty reel ideal for truck mount or mine application where existing or specialty hoses need to be used.

[Read More](#)

SKU: MRTP1320N-01

BARE TWIN PEDESTAL REEL (SUITS 1" X 20M)

Universal reel - bare (without hose) - spring-rewind. Heavy-duty reel ideal for truck mount or mine application where existing or specialty hoses need to be used.

SKU: MRTP2520N-01

HEAVY DUTY GREASE REEL - 3/8" X 15M

Macnaught's MAN range of narrow face steel hose reels offers a real step forward in hose reel design. Built with Australian conditions in mind these heavy duty powder-coated steel hose reels boast sealed bearings, stainless steel shafts, solid three sector ratchets, Viton O'rings, quality hoses and corrosion resistant fixings. A narrow face dimension has been maintained to allow multiple reels to be fitted in tight locations such as the mine site service vehicle. Industry common footprints allow for minimum changes to cabinet design. Common BSP threads are used at inlet, outlet and hose fittings and the 3/8" reels are supplied with a 1m feeder hose for convenience. Spare parts are available to expedite repair and a simple re-tensioning device allows quarter turn refinements.

SKU: MATP1920-01

SERVICE VEHICLE OIL REEL - 12MM X 15M

The MAX reel by Macnaught represents the first hose reel developed worldwide with integrated flow meter and flow register. The marriage of the brand new MX range of oval gear flow meter products featuring the revolutionary M-Lock mounting system and the equally new MAN narrow face hose reel products offers unparalleled simplicity for OEMs, installers and users alike. With the MAX range of metered hose reels there is no longer any need for separate mounting of meters, intermediate plumbing or vulnerable wiring between meters and registers. The reel comes completely fitted and wired to be placed in situ ready to function. The only installation required is bolting the unit down and the connection of the inlet fluids and outlet control. Although equally at home in static workshop situations, the MAX range of metered hose reels has been specifically designed to meet the rigors of the mobile lube service vehicle.
