

HOLDFAST

FLUID POWER

HOLDFAST Fluid Power provides a range of services, supplies and maintenance to many different industries. Our team understands the particular needs of various industries to provide best-in-class service and industry leading fluid power solutions.

KIM McLEOD
Managing Director

Welcome to Holdfast

Holdfast Fluid Power was born in 2010 from a single Ford Falcon service vehicle supporting Perth based clients predominantly in the mining industry.

Managing Director Kim McLeod having years of experience in the industry identified a gap in the market for a company that focused on service over sales.

The vision was to build an industry leading company that set the bar in high calibre people, quality products and the very best in service.

As the business grew so too did the reputation of Holdfast throughout the industry. Holdfast has maintained an extremely high customer retention rate over the years.

Many clients have been with us from the beginning. We believe this has been achieved by understanding our clients and the urgency of their industries.

Fast forward to today and we are very proud to say Holdfast has become a market leader throughout Western Australia.

Our purpose has always been to be at the very forefront of customer service and quality. It is this that drives us to deliver our very best in each encounter with our clients.

We focus on our clients, our people, our service and our quality.

We just happen to be a great fluid power company

Our People - Our Culture

Throughout the years our team has been carefully selected to ensure the Holdfast values of customer service are aligned with each and every team member.

Many of our team have been with Holdfast since the very early days and continue in their roles with the same enthusiasm and care they did on their very first day.

Newly inducted team members are often surprised when they realise the depth of knowledge and experience across the team. This is a high value point of difference when considering Holdfast as a service provider.

Values and beliefs are at the centre of who we are. We support this culture with induction, systems and processes and personal and professional growth.

WE CONSTANTLY SEEK THE BEST OF THE BEST.

Tailor Made Solutions

A blanket approach only works for a handful of clients and is usually aligned more to suit the service provider rather than the client.

Holdfast Fluid Power understand each client has different needs and requirements.

This is why we work closely with you to ensure we understand your business and operations to create a truly tailor-made package that is aligned specifically to your needs.

Positive communication and effective listening is applied.

YOU SPEAK, WE LISTEN!

INDUSTRIES

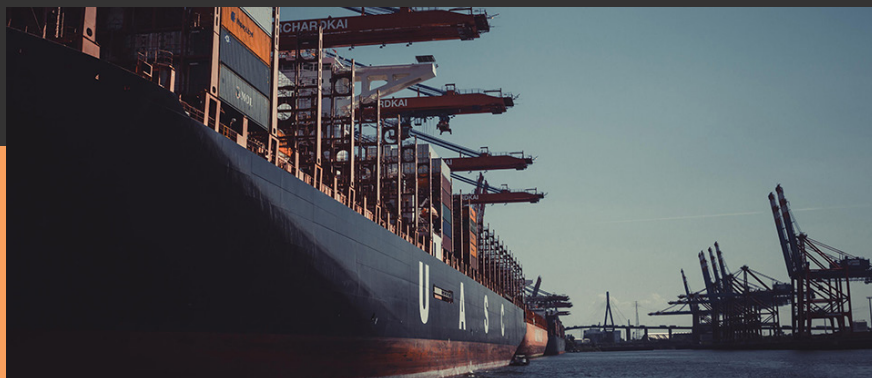

Holdfast Fluid Power provides a range of products and services that are tailored to meet the high pressure demands and harsh operating conditions encountered through out Australia.

MINING

CIVIL

MARINE

OIL & GAS

TRANSPORT

AGRICULTURE

INDUSTRIAL

Hose and Fittings

Holdfast are the premier distributor of Continental hydraulic and industrial hose and fittings in Western Australia.

Continental produce high performance hose and fittings and supply products which are utilised by some of the largest OEM's in the world.

Holdfast provide Continental Hydraulic Hose and Fittings through an number of channels which include:

- Bulk Supply
- Hydraulic Hose Assembly Containers
- On-Site Mobile Hose Service vehicles
- Complete Machine Re-hose
- OEM Hose kits for a large range of machines

Auto Lubrication

Holdfast's Auto-Lube team can assist you with your new install, fault diagnostics, repairs or commissioning of your existing system.

At Holdfast Fluid Power we specialise in all your auto lubrication needs for both fixed and mobile plant equipment with technicians available for installation, testing, fault diagnose, repairs and commissioning of old systems.

Oil Evac and Live Sampling Systems

Holdfast offer customised solutions to suit your required site specifications.

With access to Flowmax, Banlaw and Wiggins components, Holdfast can tailor solutions and kits to suit your machine.

Pressure Testing

Holdfast offers hydrostatic pressure testing up to 65,000 psi and is carried out in accordance to Australian standards AS1180.5 and Test reporting to International Standard ISO 1402.

Holdfast checks for cracking, leakage, deformities or any other signs of possible failure by applying hydrostatic pressure at a uniformed rate of increase.

Hydraulic Cylinders

Holdfast are the Western Australian distributor of Dantal Cylinders.

Dantal manufacture quality hydraulic cylinders suitable for the harshest of conditions.

A range of commonly used cylinders is available in stock or custom cylinders can be manufactured to suit individual specifications.

Fluid Transfer Equipment

At Holdfast we have a wide range of fluid transfer systems to suit all industry applications.

Our specialist team have the expertise to design bulk fluid transfer solutions specific to your requirements for any fuel, oil or other fluid.

Our technicians specialise in the supply, install and service of Graco, Macnaught & Alemlube components including diaphragm pumps, hose reels, oil & grease pumps, fluid dispensing guns, nozzles & flow meters.

We also offer a range of power options for hydraulic, pneumatic or electric hose reels & pumps.

Workshops

Holdfast currently service our clients from 3 branch locations in Forrestfield, Naval Base and Broome.

Our workshop capabilities include:

- While you wait trade counters
- Custom and OEM hydraulic hose kits
- Pressure testing to Australian Standards
- Custom hydraulic solutions and repairs.

Mobile Services

Our fleet of modern service vehicles are equipped with the latest hydraulic hose assembly equipment, inventory and skilled technicians to support any client in the field.

Our service vehicles support our clients with 24/7 break-down support, on-site hose audits, service, installation and planned maintenance.

Hydraulic Hose Containers

Holdfast supply and maintain hydraulic hose assembly containers for clients in metro and remote areas of Western Australia.

A range of supply options are available specific to client's specific requirements.

Our capability includes:

- Purchase or Lease options are available
- Hydraulic Hose technicians available for on-site support 24/7 for short and long-term contracts
- Purchase and consignment options for inventory
- Complete inventory support inclusive of regular site visits

A man with red hair and a beard, wearing an orange and blue high-visibility work shirt, stands in front of a yellow and white truck. The truck has "HOLDFAST" written on its side in large orange letters. The man's shirt also has "HOLDFAST" on the chest. The background is slightly blurred, showing the truck and some greenery.
